When surgery is the only way to change your life for the better.

“Dr. Slotman really cared about me as a person. He always spent time with me and he always listened. He is truly concerned for his patients.

I am very proud of what I did and of my results.

I am also proud to know Dr. Slotman. I feel wonderful.” – T.Y.

“He saved my life – it’s that simple.” – G.T.

Excellence in total care for surgical weight loss.

If you are more than one hundred pounds overweight, then you’ve probably spent years facing the many obstacles that come with obesity... from dreading the next flight of stairs to wondering if you’ll fit in the seat on a plane or the chair in a restaurant. That’s no way to live your life.

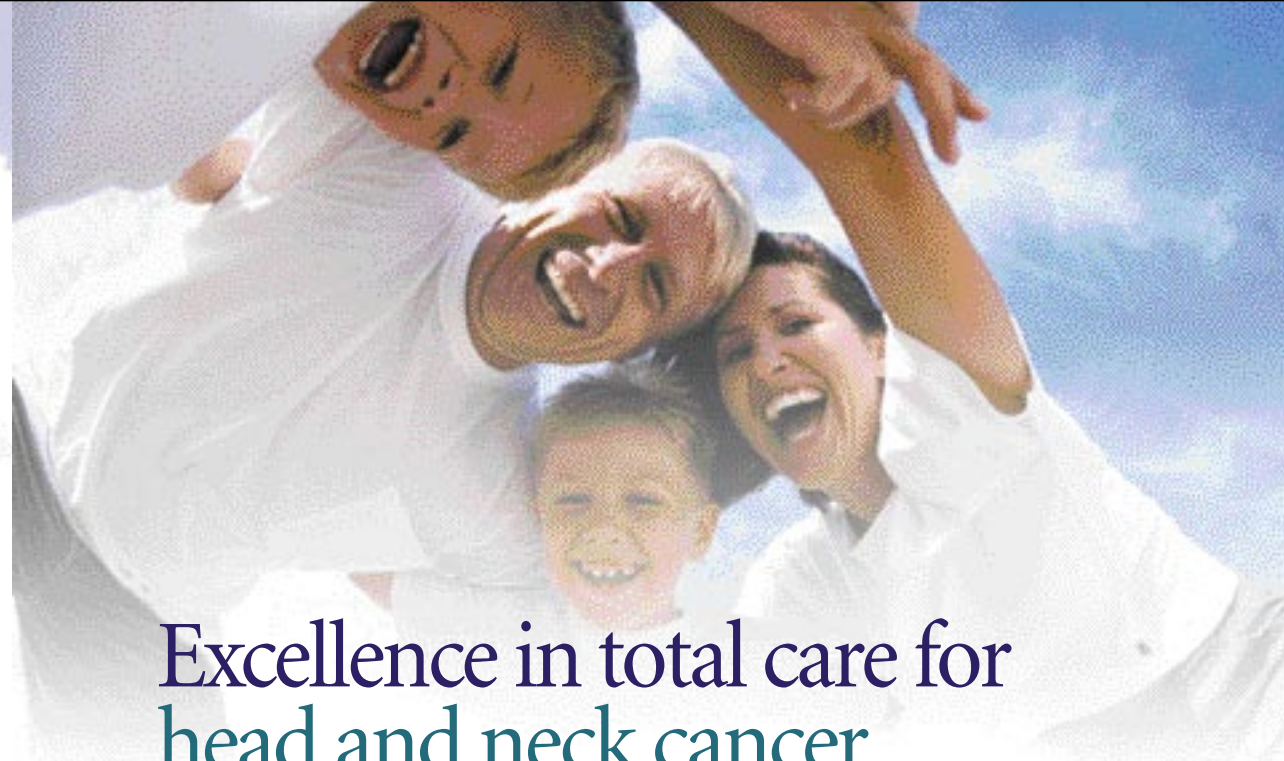

You’ve probably tried everything to reduce your weight – multiple diets, exercise plans, gadgets, gimmicks and possibly even drugs. So you know exactly how your weight is impacting your life – and the lives of those who care about you.

For millions of people in your situation, it’s practically impossible to lose weight and keep it off without serious help. For many, that help comes in the form of gastric bypass or bariatric weight-loss surgery – after all else has failed. That’s why so many people seek out Gus J. Slotman, M.D.

Dr. Slotman is the Director of Bariatric Surgery at Our Lady of Lourdes Medical Center, a designated Bariatric Surgery Center of Excellence by the American Society for Bariatric Surgery. In addition to his renowned meticulous surgical skill with the Roux-en-Y open gastric bypass technique, Dr. Slotman offers you the benefit of his many years of teaching, lecturing and authorship about weight-loss surgery.

With Dr. Slotman, you get a dual-board-certified surgeon who works hard to ensure your safety and a successful outcome. Combined with his remarkably low complication rate and shorter hospital stays, Dr. Slotman offers you caring, compassion and multidisciplinary expertise that will inspire your confidence and trust.

Even if you have a body mass index (BMI) above 70 (the normal range is 15 to 25), Dr. Slotman can help you. Just as he has helped so many others before you. Even five years after surgery, 95% of his patients have maintained at least half their weight loss.

Excellence in total care for head and neck cancer.

More than 55,000 Americans will develop head and neck cancer (mostly preventable) this year. Nearly 13,000 will die from it.

Cancers of the head and neck are curable if detected early. Fortunately, most head and neck cancers produce early symptoms – a lump in the neck, a growth in the mouth, voice changes, difficulty swallowing, persistent earache, spitting up blood and skin changes (symptoms that may also be present *in the absence* of cancer).

Dr. Slotman and his radiation oncology and medical oncology colleagues have established a state-of-the-art network for treating head and neck cancer. Together they manage most advanced cancers without the need for radical surgery. When surgery is required, hyperbaric oxygen therapy and the Nd:YAG laser optimize operative results.

Your comprehensive multidisciplinary care includes private consultation with Dr. Slotman and medical/radiation oncologists, as needed. You will receive all the presurgical head, neck, throat and mouth assessments you need, including thorough health evaluations. Most patients will also have their larynx visualized with indirect or direct fiberoptic laryngoscopy.

After your multidisciplinary treatment, you’ll take part in an aftercare plan designed specifically for you, including dietary guidance from a certified nutritionist and support groups for all the understanding and motivation you need throughout recovery and beyond.

Instead of spending five or ten minutes with you then forgetting your name, Dr. Slotman remembers you for a lifetime.

“I am alive today. I mean really alive. Before the surgery, I was in pain... I had to have help getting to and from my office at work. Climbing stairs was a major undertaking... After the surgery, I noticed major changes in my life. I was able to eliminate my blood pressure medicine... I started to get compliments on my appearance... and wear clothes that make me feel like a woman. I look at other people who are in the same shape I was two years ago and just want to ‘wish’ them in the same health I now have. I have no regrets. I have my life back.

Thanks to Dr. Slotman. Thank you...” – C.F.

Excellence in *real* patient-focused care.

Whether you need safe, effective weight-loss surgery or exceptional care for head and neck cancer, we can help. By limiting our practice to the things we do best and the areas where we can do the greatest good, we continue to improve our knowledge and abilities.

We continue to compete with the leading and best-known surgical weight loss and head/neck cancer care institutions in the United States. With documented outcomes that include extremely low complication rates, shorter patient hospital stays and excellent outcomes, we are a well-qualified choice for treatment.

By limiting our practice only to bariatric surgery, critical care and head and neck cancer, we spend more time with each patient and provide more focused one-on-one care. Care that goes beyond the initial consultation and the most thorough evaluation. Care that goes beyond the safest, most effective surgical procedures. By limiting our practice to the patients who need us most, we can follow each one of them for a lifetime.

We will continue to offer advice, care and support for as long as you need us. Why? Because we want you to have the best possible chance – to be there for your family and to do all the things you’ve ever dreamed of doing. Giving you the opportunity to live your life to the fullest is our greatest privilege.

We want to help you. Take the first step and call 856-424-0001.
